PROFESSIONAL SUMMARY

Dynamic Full Stack Web Developer leveraging expertise in MERN stack, with a keen capability to learn new tech quickly and effectively. Skilled in developing efficient server-side APIs, frontend components, and database models. Strong in collaboration, problem-solving, and adopting generative AI to enhance productivity and innovation.

PROJECTS

1. Whiteboard Application | |

JavaScript | HTML5 | CSS3 | Responsive Web Design | Git

- Developed a real-time collaborative whiteboard utilizing core web technologies like JavaScript, HTML5, and CSS3.
- Implemented advanced drawing tools, sticky notes, zooming, and export functionalities to enhance user collaboration.
- Designed a responsive interface ensuring cross-device compatibility and seamless user experience.
- Integrated authentication for saving and loading personalized whiteboards.
- Managed themes and undo/redo capabilities to improve usability and user satisfaction.

2. Apollo.io | |

HTML5 | Git | Responsive Web Design | CSS3 | Bootstrap

- Contributed to an intermediate-level project focused on lead generation and management, using HTML5, CSS3, and Bootstrap.
- Developed features for AI-powered lead recommendations and real-time data updates, ensuring dynamic content delivery.
- Collaborated in creating a responsive design conducive to user engagement across different devices.
